London, United Kingdom

Shipping & Maritime

- A venture lab, affiliate of a shipping company (Lomar)
- Belongs to a diversified & privately owned group (Libra)
- We build relationships with founders and support them at developing deep-tech solutions by giving them access to vessels, industry expertise and investors.
- We are leading the way by pioneering the implementation of those ideas in real world situations.

Problem

- High CO2 emissions, tightening regulatory environment, and increasing operational costs
- Shipping has long been in the shadows of sustainability movements, and actions
- It is gradually becoming to catch up through innovation

Context

- Shipping would be the 3rd largest polluter if it were a country
- Increasing need for socially responsible practices
- Shipping is a global industry – affecting parties worldwide

Significance

- **2030** constitutes a “hard-deadline” for the shipping industry to reduce its CO2 emissions by 80% – **FuelEU & EU ETS**
- Dry dock cycle for implementation of these new technologies is now (5-year cycle)

Need to decarbonise maritime

- The goal is to facilitate the adoption of decarbonising technologies into a market with extremely high barriers to entry
- In a market where everyone is racing to be second we are willing to become an early adopter and trial ground breaking technologies

Sweat
Investment

help deep-tech hardware start-ups
de-risk and validate their product
by granting access to ships and sharing
industry expertise

Benefits

Beneficiaries

EIC Financial support

Beneficiaries can receive up to €60,000 from the EIC per pilot to explore with **lomarlabs** the technical and commercial viability of their product.

Vessel Data & Access

Our collaboration could involve receiving real-time data from ocean-going vessels and even the potential to perform pilots onboard to validate the technology.

Expert Guidance

Drawing on nearly five decades of operational innovation at Lomar Shipping, **lomarlabs** is a maritime venture lab. The team can offer unparalleled insight and tailored support to beneficiaries, harnessing the extensive experience and market intelligence embedded within the

group.

Looking forward to navigating the future of

lomarlabs

Collaboration with innovators

Innovation thrives when there's mutual trust, clarity of purpose, and a shared commitment to scale impact. True progress comes when strategic, commercial, and technical teams work in symphony from day one—collaboration isn't a stage, it's a mindset.

Pioneers in maritime innovation

At **lomarlabs**, we don't just support innovation—we help steer it. By giving early-stage companies access to funding, our fleet, and deep market insight, we accelerate the deployment of transformative technologies shaping the future of maritime.

Unlocking maritime innovation via EIC initiatives

Partnering with the EIC is a force multiplier, enabling blended finance and de-risking scalable technologies that reduce emissions, enhance automation and improve safety. Together, we drive regulatory alignment and systemic change in global shipping.

Looking forward to navigating the future of maritime together!
