## About the solution

### KLIMA-PUR

**KLIMA-PUR** Windows is a new generation of high-performance windows made from BioPolyurethane, designed to decarbonise building renovation without compromising heritage value, comfort or durability.

Using INDRESMAT's patented sRIM-PUR<sup>®</sup> manufacturing technology, KLIMA-PUR delivers PassivHaus-certified thermal performance, excellent acoustic comfort, low weight and circular design.

It addresses three major pain points in building renovation:  
high energy losses through old windows, limited sustainable alternatives to PVC/aluminium/timber, and the difficulty of upgrading heritage or traditional buildings without altering their architectural identity.

## End-user

**Public or private building owner, developer, housing agency, architect or window manufacturer** committed to sustainable renovation, energy efficiency and high-quality construction.

Organisations managing buildings where windows are a critical pain point: poor insulation, discomfort, noise, ageing materials or strict architectural constraints. They value innovation, circularity and long-term performance, and are willing to validate and scale new solutions that can reduce energy demand while preserving the identity of the building.
