About the solution

GO-START

GO-START is a smart hybrid battery system that combines supercapacitors and lithium-ion batteries to eliminate vehicle downtime and fuel waste for heavy commercial fleets. By preventing dead-starts, frequent battery failures, and excessive engine idling, GO-START cuts operating costs while improving driver comfort and sustainability.

End-user

Large, international transport operators focused on cost management and operational efficiency. The “dream client” is a pragmatic innovator who actively seeks out new technology, recognizing that embracing solutions like GO-START is essential for both eliminating major operational waste (dead-starts, idling) and gaining precise, long-term control over fleet expenditure.
